Bristol, RI 02809

Dear Ms. Williamson:

In recognition of both the critical need for alternative energy development as well as the importance of the development of collaborative models for governments to share resources, Roger Williams University is pleased to participate in partnership with the East Bay Energy Consortium (EBEC) on this Rhode Island Renewable Energy Fund grant request. As a demonstration of our commitment to the most valuable quest, Roger Williams University will supply as available, facility, students, expertise and technical support for this project, acting as a convener and coordinator for the various project phases.

Additionally, Roger Williams University will assign top priority to the needs of EBEC in terms of any need for available University MET towers for purposes of collecting wind speed data.

Very truly yours,

Peter B. Wilbur
Vice President
